

Health Equity Focus Information

We recommend the team document how they reached their decision and make it available for the entire team for future reference.

- Useful at points of team member turnover/leadership changes.
- Useful for if and when the team decides to change their health equity focus

This can be completed by the whole team or by a team representative who can summarize the team’s process for identifying a health equity focus.

State/District Team _____

What information did your team use to identify your Health Equity Focus?

- Use this table to list qualitative or quantitative data points, personal/professional expertise, and organizational strengths that led to the team’s health equity focus.

Health Equity Focus

Source of Data or Information	Key Data or Information Point	Type of information (ex: quantitative, qualitative data, personal/professional knowledge, organization strengths)	Health equity focus(es) suggested by data / information
I.e. MedStar existing programming	I.e. Build on learnings from MedStar’s Family Choice Cares Connect Pilot Program that centers patients with co-morbid serious mental illness and chronic disease, many of whom have substance use disorder and/or housing and food insecurity	I.e. organizational strengths	I.e. Chronic conditions, ED utilization, SMI, SUD, HRSN

1. Briefly describe how the team utilized the data/information above to identify their health equity focus. What method(s) were used to make this decision (i.e. consensus, majority rules voting)?

■ Enter text here.

0. What is the team's Health Equity Focus?
